

Evaporation Investigation

You will need:

a bowl of water

a sunny footpath

a shady footpath

Method:

1. Dip your hand in water and make print on sunny footpath, count or time how long it takes to disappear.
2. Dip your hand in water and make print on shady footpath, count or time how long it takes to disappear.
3. Record your findings.

My hand print lasted.....seconds in the sun

My hand print lasted.....seconds in the shade
